[Address]

By Post

15th November 2024

Reference: Intended application by the National Roads Authority (operating as Transport Infrastructure Ireland) for the Railway (Luas Finglas – Broombridge to Charlestown) Order [2024]

Dear Sir/Madam,

I refer to the above matter.

The National Roads Authority (operating as Transport Infrastructure Ireland) (referred to herein as “**TII**”) intends to submit an application to An Bord Pleanála under section 37(1) of the Transport (Railway Infrastructure) Act 2001 (as amended) (“**the 2001 Act**”) for the Railway (Luas Finglas – Broombridge to Charlestown) Order [2024].

You may be an owner or occupier of land, and/or have rights over or an interest in land, referred in the documents which will accompany the Railway (Luas Finglas – Broombridge to Charlestown) Order [2024] application.

Enclosed Documents

In accordance with Section 40(1)(d) of the 2001 Act and by way of service upon you, we enclose herein the following documents relating to the Railway (Luas Finglas – Broombridge to Charlestown) Order [2024] application, comprising:

1. A copy of the newspaper notice relating to the application;
2. A copy of the draft Railway Order (excluding the Schedules);
3. Relevant extracts from the plan of the proposed railway works;
4. Relevant extracts of plans (including maps or drawings) which indicate the extent of the lands and/or rights over lands affected being:
 - Individualised Land Plan(s), and
 - Extracted Property Plan(s);
5. Relevant extracts from the Book of Reference to the plan (indicating the identity of the owners and of the occupiers of the lands described in the plan);
6. Relevant extracts from the Environmental Impact Assessment Report (being the Non-Technical Summary);
7. Relevant Extracts from the AA Screening Report and Natura Impact Statement: and
8. A User Guide to assist in understanding of the documentation is contained within this letter.

It is recommended that you consider these enclosures carefully. In light of what is proposed, and if necessary, you should seek advice in respect of your own interests.

Written Submissions

As set out in the enclosed newspaper notice, An Bord Pleanála is the competent authority responsible for taking the decision whether or not to grant the order, from which relevant information can be obtained and to which comments or questions can be submitted. An Bord Pleanála will consider any submissions which are submitted in writing to it between 22nd November 2024 and [5:30pm] on 20th January 2025 by any persons in relation to the draft Railway Order or in relation to the likely effects on the environment of the proposed railway works, and the likely significant effects of the proposed railway works on European Sites.

Submissions must be lodged no later than 5.30pm on 20th January 2025 and must be addressed to An Bord Pleanála (Strategic Infrastructure Division), 64 Marlborough Street, Dublin 1, D01 V902 and marked “Railway (Luas Finglas – Broombridge to Charlestown) Order [2024]”.

Inspection of Documents

A copy of the draft Railway Order and the documentation accompanying the application are available for inspection at the locations identified in the enclosed newspaper notice and on the dedicated Luas Finglas project website www.luasfinglasro.ie.

Data Protection

As a part of TII's application to An Bord Pleanála for the Railway (Luas Finglas – Broombridge to Charlestown) Order [2024], TII will process the personal data of those who may be the owners, and/or occupiers of the properties impacted by Luas Finglas, as necessary to comply with applicable legislation, namely the 2001 Act. This may involve the processing of personal data that relates to you including your name, address and details relating to whether you are a property owner, or occupier of properties impacted by the Luas Finglas, together with information about that property (e.g. property records from, inter alia, the Land Registry and the Registry of Deeds, survey records and photographs of the property) to prepare a document referred to as a Book of Reference to support the application. In line with the requirements of the legislation this may also involve some of this information being put on display to the public at various offices of Fingal County Council, Dublin City Council, TII, the National Transport Authority and An Bord Pleanála and being made available on the Luas Finglas railway order website and the website of An Bord Pleanála. In each case this will be done in a manner that is proportionate and necessary to comply with the legislation. Please see further information in respect of our processing of your personal data, including information on your rights as a data subject, in the Data Protection Notice available at www.luasfinglasro.ie.

Contact Details

Should you require any further information, please do not hesitate to contact the Luas Finglas project team at Tel: 1800 666 888 or through email info@luasfinglas.ie

Yours faithfully

Sandra McCarthy
Secretary to the Authority
National Roads Authority (operating as Transport Infrastructure Ireland)
Parkgate Business Centre
Parkgate Street
Dublin 8
D08 DK10

User guide to the information provided in this postal pack

As the recipient of this user guide, you may be an owner or occupier of land, and/or have rights or an interest in land, referred to in the documents which will accompany the Luas Finglas Railway Order application. The following step-by-step guide should help you to understand how the information contained in this pack (as listed on page 1 of the covering letter) relates to any property interest you may have:

1. A copy of the **newspaper notice** relating to the application, providing you with a general description of the proposed works together with various other information relating to the application.
2. A copy of the **draft of the proposed Railway Order** (excluding the Schedules), which will be submitted to the Board for its approval as part of the application.
3. Relevant extracts from the **plans of the proposed railway works**, which are the general arrangement drawing(s) for the section of the Luas Finglas project corresponding with your property. The general arrangement drawing(s) illustrate the various components of the proposed Luas Finglas project in the vicinity of your property. A written description of the proposed railway works is set out in Schedule 1 to the draft Railway Order, which may be viewed at www.luasfinglasro.ie and at the display locations referred to in the enclosed newspaper notice.
4. Relevant extracts of plans (including maps or drawings) which indicate the extent of the lands and/or rights over lands affected include:
 - **Individualised Land Plan(s)** (Title: Luas Finglas - Property Detail), which is the drawing(s) marking out your property (only), which is extracted from the below property plan.
 - **Extracted Property Plan(s)** (Title: Luas Finglas - Property Details), shows the extent and types of land acquisition that TII proposes to acquire to facilitate the construction, operation, and maintenance of the Luas Finglas project along the section of the route close to your property.
5. Relevant extracts from the **Book of Reference** to the plan, indicating the identity of the owners and of the occupiers of the lands described in the plan.

The below table provides you with a sample of the unique land take referencing and numbering for “D1-300-A1”:

| | | | |
|--|---|--|---|
| D1 = Luas Finglas Project Reference | 300 = relevant extracted property plan reference | A = Permanent Acquisition T = Temporary acquisition/possession W = Wayleave / rights of way to be acquired / extinguished. | 1 = unique land owner reference |
|--|---|--|---|

6. Relevant extracts from the Environmental Impact Assessment Report (EIAR); being the **Non-Technical Summary** which summarises the likely effects on the environment as detailed in the EIAR.
7. Relevant Extracts from the **AA Screening Report** and **Natura Impact Statement (NIS)**. The NIS is a statement of the implications of a project for European sites (European sites are sites designated to protect important types of plants, animals and habitats), which informs an assessment by a competent authority (in this case An Bord Pleanála) as to whether the project, by itself or in combination with other plans or projects, would adversely affect the integrity of any European sites in view of the Sites’ conservation objectives.

If you require further assistance to understand how the information contained in this pack relates to your property, please do not hesitate to contact the Luas Finglas project team at Tel: 1800 666 888 or through email info@luasfinglas.ie

TII processes personal data in accordance with its Data Protection Notice available at www.tii.ie.

RELEVANT EXTRACTS FROM LUAS FINGLAS APPROPRIATE ASSESSMENT SCREENING

The Appropriate Assessment Screening for the Luas Finglas project (hereinafter referred to as the "proposed Scheme") has examined and analysed, based on the best scientific knowledge, the potential for the proposed Scheme to have likely significant effects, either individually or in combination with other plans or projects, on any Natura 2000 site.

Article 6(3) of Council Directive 92/43/EEC of 21st May 1992 on the Conservation of Natural Habitats and of Wild Fauna and Flora (as amended) (the "Habitats Directive") requires that, any plan or project not directly connected with or necessary to the management of European sites, but likely to have significant effects thereon, either individually or in combination with other plans or projects, shall be subject to AA of its implications for the European sites in view of their conservation objectives. The requirements of Article 6(3) of the Habitats Directive have been transposed into Irish law by Part XAB of the Planning and Development Act 2000 (as amended) and the European Communities (Birds and Natural Habitats) Regulations, 2011 (as amended).

The screening assessment used the source-pathway-receptor (S-P-R) model as outlined in guidance (OPR, 2021). Using the source-pathway-receptor model allowed for the potential significant effects to be eliminated if no viable source, pathway, or receptor was present.

The S-P-R method uses an examination of the construction methods or proposed Scheme description to allow sources of impact to be determined. This also allows a Zone of Influence (Zol) for the proposed Scheme to be generated based on the size, scale and nature of the works involved. The pathways for impact are also analysed to see if a functional pathway for impact is present. This screening report assesses the potential presence of surface water, groundwater, land and air impact pathways between the proposed Scheme and Natura 2000 sites within the Zol. Using information gathered from desk sources (e.g. mapped Qualifying Interests (QIs) and Special Conservation Interests (SCIs) from the Conservation Objectives for the site) and from field surveys, receptors within the Zol are identified. In some cases, sensitive receptors may also play a role in determining the Zol. If any of the three parts to the model are not present (source-pathway-receptor) the potential for a likely significant effect from the proposed Scheme on the Natura 2000 network can be discounted.

The test for AA Screening is whether the proposed Scheme could have a 'likely significant effect' on any Natura 2000 site. A likely significant effect is defined as any effect that could undermine the conservation objectives of a Natura 2000 site, either alone or in combination with other plans or projects. There must be a causal connection between the proposed Scheme and the QIs and SCIs of the site, which could result in potential likely significant effects on the site. The likely significant effect test is a lower threshold for the screening assessment than 'adverse effect on site integrity' considered at Appropriate Assessment stage (Stage 2) as screening is intended to be a preliminary examination for potential effects.

The Zol was used to identify Natura 2000 sites that could be impacted by the proposed Scheme. For each of these sites, the QI and SCI features and their associated conservation objectives were identified, and the possibility of likely significant effect was determined by a combination of location, ecological and hydrological connectivity, sensitivity of receptor and magnitude of the source of impact.

The Natura 2000 sites within the Zol are listed in Table 1 below.

Table 1: Natura 2000 sites within the Zol of the proposed Scheme

| Site Name | Designation | Direct distance from site | Hydrological distance from site |
|---|-------------|---------------------------|---------------------------------|
| North Dublin Bay [000206] | SAC | 7.1km | 9.0km (direct) |
| South Dublin Bay [000210] | SAC | 6.4km | 12.4km (direct) |
| Howth Head [000202] | SAC | 13.3km | n/a |
| Rockabill to Dalkey Island [003000] | SAC | 13.2km | 15.2km (direct) |
| South Dublin Bay and River Tolka Estuary [004024] | SPA | 4.1km | 5.7km (direct) |
| North Bull Island [004006] | SPA | 7.1km | 9.0km (direct) |
| Baldoyle Bay [004016] | SPA | 10.6km | n/a |
| North-West Irish Sea [004236] | SPA | 9.6km | 11.2km (direct) |

In carrying out this AA Screening, mitigation measures have not been taken into account. Standard best practice construction measures which could have the effect of mitigating any effects on any European Sites have similarly not been taken into account.

On the basis of the screening exercise carried out, it can be concluded that in the absence of mitigation, there is possibility of likely significant effects on North Dublin Bay SAC, South Dublin SAC, North Bull Island SPA, South Dublin Bay and River Tolka Estuary SPA, Rockabill to Dalkey Island SAC and North-West Irish Sea SPA, and their respective QIs / SCIs, by the proposed Scheme during the Construction and Operational Phases through the surface water, groundwater-to-surface water, land and air, and air-to-surface water pathways.

On the basis of objective information and in light of best scientific knowledge and applying the precautionary principle, it can be concluded that the proposed Scheme, either individually or in combination with other plans and projects, and in the absence of mitigation, is not likely to have a significant effect on Howth Head SAC and Baldoyle Bay SPA, in view of the sites conservation objectives, and that there is no reasonable scientific doubt in relation to this conclusion. As Howth Head SAC QIs are located above the coastal waters, there is no hydrological connection from the proposed Scheme to the SAC. The waters of the Baldoyle Bay SPA are located beyond the reasonable surface water impact pathway (distance) and as such, no likely significant effects are predicted. Furthermore, the SCI bird species of Baldoyle Bay SPA do not frequent lands within the disturbance buffer of the proposed Scheme and therefore, will not result in any likely significant effects for these SCI bird species.

Therefore, it is the professional opinion of the authors of this report that the application for approval for the proposed Scheme does require a Stage Two Appropriate Assessment in respect of North Dublin Bay SAC, South Dublin SAC, North Bull Island SPA and South Dublin Bay and River Tolka Estuary SPA, Rockabill to Dalkey Island SAC and North-West Irish Sea SPA, and, consequently, the preparation of a Natura Impact Statement.

RELEVANT EXTRACTS FROM LUAS FINGLAS NATURA IMPACT STATEMENT

The Natura Impact Statement (NIS) has examined and analysed, based on the best scientific knowledge, with respect to those European sites within the Zol of the proposed Scheme, the potential impact sources and pathways, the manner in which these could potentially impact on the European sites' QI habitats and species and SCI bird species, and whether the predicted impacts would adversely affect the integrity of the European sites. The following Natura 2000 (European) sites are identified within the Zone of Influence (Zol) of the proposed Scheme. The possibility of significant effects on any other Natura 2000 site can be excluded.

- North Dublin Bay SAC;
- South Dublin Bay SAC;
- Rockabill to Dalkey Island SAC;
- North Bull Island SPA;
- South Dublin Bay and River Tolka Estuary SPA; and
- North-west Irish Sea SPA.

All the Qualifying Interests (QIs) / SCIs of the six Natura 2000 sites listed above and screened into this assessment are:

- Mudflats and sandflats not covered by seawater at low tide [1140];
- Reefs [1170];
- Annual vegetation of drift lines [1210];
- Salicornia and other annuals colonising mud and sand [1310];
- Atlantic salt meadows (*Glauco-Puccinellietalia maritima*) [1330];
- Mediterranean salt meadows (*Juncetalia maritimi*) [1410];
- Embryonic shifting dunes [2110];
- Shifting dunes along the shoreline with *Ammophila arenaria* (white dunes) [2120];
- Fixed coastal dunes with herbaceous vegetation (grey dunes) [2130];
- Humid dune slacks [2190];
- Harbour Porpoise *Phocoena phocoena* [1351];
- Petalwort *Petalophyllum ralfsii* [1395];
- Red-throated Diver *Gavia stellata* [A001];
- Great Northern Diver *Gavia immer* [A003];
- Fulmar *Fulmarus glacialis* [A009];
- Manx Shearwater *Puffinus puffinus* [A013];
- Cormorant *Phalacrocorax carbo* [A017];
- Shag *Phalacrocorax aristotelis* [A018];
- Light-bellied Brent Goose *Branta bernicla hrota* [A046];
- Common Shelduck *Tadorna tadorna* [A048];
- Teal *Anas crecca* [A052];
- Pintail *Anas acuta* [A054];
- Shoveler *Anas clypeata* [A056];
- Common Scoter *Melanitta nigra* [A065];
- Oystercatcher *Haematopus ostralegus* [A130];
- Ringed Plover *Charadrius hiaticula* [A137];
- Golden Plover *Pluvialis apricaria* [A140];
- Grey Plover *Pluvialis squatarola* [A141];
- Knot *Calidris canutus* [A143];
- Sanderling *Calidris alba* [A144];
- Dunlin *Calidris alpina* [A149];
- Black-tailed Godwit *Limosa limosa* [A156];
- Bar-tailed Godwit *Limosa lapponica* [A157];
- Curlew *Numenius arquata* [A160];
- Redshank *Tringa totanus* [A162];
- Turnstone *Arenaria interpres* [A169];
- Little Gull *Larus minutus* [A177];
- Black-headed Gull *Chroicocephalus ridibundus* [A179];
- Common Gull *Larus canus* [A182];
- Lesser Black-backed Gull *Larus fuscus* [A183];
- Herring Gull *Larus argentatus* [A184];
- Great Black-backed Gull *Larus marinus* [A187];
- Kittiwake *Rissa tridactyla* [A188];
- Roseate Tern *Sterna dougallii* [A192];
- Common Tern *Sterna hirundo* [A193];
- Arctic Tern *Sterna paradisaea* [A194];
- Little Tern *Sterna albifrons* [A195];
- Guillemot *Uria aalge* [A199];
- Razorbill *Alca torda* [A200];
- Puffin *Fratercula arctica* [A204]; and
- Wetland and Waterbirds [A999].

Avoidance, design requirements and mitigation measures are set out within the NIS (and its appendices) and the effective implementation of these mitigation measures will ensure that any impacts on the site-specific conservation objectives of Natura 2000 sites will be avoided during the Construction and Operation Phases of the proposed Scheme, such that there will be no adverse effects on any Natura 2000 sites.

It has been objectively concluded, following an examination, analysis and evaluation of the relevant information, including in particular the nature of the predicted impacts from the proposed Scheme and the effective implementation of the mitigation measures proposed, that the proposed Scheme will not adversely affect (either directly or indirectly) the integrity of any Natura 2000 site in view of the each sites' site-specific conservation objectives, either alone or in combination with other plans or projects, and there is no reasonable scientific doubt in relation to this conclusion.

To confirm this conclusion, a checklist from (DEHLG, 2009) has been completed in Table 1 below.

Table 1: Integrity of Natura 2000 site checklist (DoEHLG, 2009)

| Conservation objectives: does the project or plan have the potential to: | Yes / No |
|---|--|
| Cause delays in progress towards achieving the conservation objectives of the site? | No - Following mitigation, no significant adverse residual impacts have been identified that will prevent achievement of the conservation objectives of the assessed site. |
| Interrupt progress towards achieving the conservation objectives of the site? | No - Following mitigation, no significant adverse residual impacts have been identified that will prevent achievement of the conservation objectives of the assessed site. |
| Disrupt those factors that help to maintain the favourable conditions of the site? | No - Potential adverse impacts via surface water; land and air; and groundwater pathways identified during the screening process can be mitigated against. |
| Interfere with the balance, distribution and density of key species that are the indicators of the favourable condition of the site? | No - Potential adverse impacts on the species of North Dublin Bay SAC; South Dublin Bay SAC; Rockabill to Dalkey Island SAC; North Bull Island SPA; South Dublin Bay and River Tolka Estuary SPA; and North-west Irish Sea SPA are not predicted, as impacts will be avoided by implementing the mitigation and avoidance measures detailed in this report. |
| Other objectives: does the project or plan have the potential to: | |
| Cause changes to the vital defining aspects (e.g. nutrient balance) that determine how the site functions as a habitat or ecosystem? | No - Potential adverse impacts from suspended solid and nutrient release are not predicted, as measures will be included within working protocols to ensure potential impacts are effectively mitigated. |
| Change the dynamics of the relationships (between, for example, soil and water or plants and animals) that define the structure and/or function of the site? | No - Potential adverse impacts relating to water quality have been identified, which have the capacity to impact the functioning and dynamics of the site; however, these impacts will be avoided through the implementation of prescribed mitigation measures. |
| Interfere with predicted or expected natural changes to the site (such as water dynamics or chemical composition)? | No - Potential adverse impacts from changes to the hydrological regime and suspended solid/nutrient/pollutant release are not expected as measures are included within working protocols to ensure potential impacts are effectively mitigated. |
| Reduce the area of key habitats? | No - Potential adverse impacts on the habitats of North Dublin Bay SAC; South Dublin Bay SAC; Rockabill to Dalkey Island SAC; North Bull Island SPA; South Dublin Bay and River Tolka Estuary SPA; and North-west Irish Sea SPA are not predicted given that the mitigation measures detailed within the NIS will safeguard the habitats, and ex-situ habitats used by the SCI bird species associated with these Natura 2000 sites. |

| Conservation objectives: does the project or plan have the potential to: | Yes / No |
|--|---|
| <p>Reduce the population of key species?</p> | <p>No - Potential impacts to key species of the North Dublin Bay SAC; South Dublin Bay SAC; Rockabill to Dalkey Island SAC; North Bull Island SPA; South Dublin Bay and River Tolka Estuary SPA; and North-west Irish Sea SPA are not predicted, as impacts will be avoided by implementing the mitigation measures detailed.</p> |
| <p>Change the balance between key species?</p> | <p>No - Potential impacts to key species for which the North Dublin Bay SAC; South Dublin Bay SAC; Rockabill to Dalkey Island SAC; North Bull Island SPA; South Dublin Bay and River Tolka Estuary SPA; and North-west Irish Sea SPA are designated are not predicted, as impacts will be avoided by implementing the mitigation measures detailed.</p> |
| <p>Reduce diversity of the site?</p> | <p>No - The identified mitigation measures will ensure that the current diversity of North Dublin Bay SAC; South Dublin Bay SAC; Rockabill to Dalkey Island SAC; North Bull Island SPA; South Dublin Bay and River Tolka Estuary SPA; and North-west Irish Sea SPA is maintained.</p> |
| <p>Result in disturbance that could affect population size or density or the balance between key species?</p> | <p>No - Potential impacts to the population size, density or balance of key species are not predicted, as impacts will be avoided by implementing the mitigation measures detailed.</p> |
| <p>Result in fragmentation</p> | <p>No – Potential impacts resulting in fragmentation of species or habitats are not predicted as impacts will be avoided by implementing the mitigation measures detailed.</p> |
| <p>Result in loss or reduction of key features (e.g. tree cover, tidal exposure, annual flooding etc.)?</p> | <p>No - Potential adverse impacts on key features of North Dublin Bay SAC; South Dublin Bay SAC; Rockabill to Dalkey Island SAC; North Bull Island SPA; South Dublin Bay and River Tolka Estuary SPA; and North-west Irish Sea SPA are not predicted, as impacts will be avoided by implementing the mitigation measures detailed.</p> |
